**AFTER FINAL EXPEDITED PROCEDURE**

This listing of claims replaces all prior versions, and listings of claims in the instant application:

**Listing of Claims:**

1. (Cancelled)
2. (Cancelled)
3. (Cancelled)
4. (Previously Presented) A method comprising:  
generating a binary specification object for a first execution environment;  
generating a binary specification object for a second execution environment;  
generating a bridge object wherein said bridge object is used in mapping objects from said second execution environment to said first execution environment; and  
using said bridge object to generate a proxy wrapping an interface in said second execution environment.
5. (Cancelled)
6. (Previously Presented) A method for using functionality in a second execution environment in a first execution environment comprising:  
calling a method in a proxy interface in said first execution environment; and  
converting said method call by said proxy interface to a corresponding method call for execution in said second execution environment, wherein said converting said method call further comprises:

using a type description to convert parameters  
from said first execution environment to said second  
execution environment.

7. (Cancelled)

8. (Cancelled)

9. (Cancelled)

10. (Cancelled)

11. (Original) The method of Claim 6 wherein said second  
execution environment is a C++ programming language execution  
environment.

12. (Original) A method for using functionality in a  
second execution environment in a first execution environment  
comprising:

calling a method in a proxy interface in said first  
execution environment;

converting said method call by said proxy interface  
to a corresponding method call for execution in said  
second execution environment, wherein said converting said  
method call comprises:

using a type description to convert parameters  
from said first execution environment to said second  
execution environment; and

dispatching said corresponding method call for  
execution in said second execution environment to said  
second execution environment by said proxy interface.

13. (Original) The method of Claim 12 further  
comprising:

executing said corresponding method call in said second execution environment, and returning results of said execution to said proxy interface.

14. (Original) The method of Claim 13 further comprising:

using a type description to convert said returned results from said second execution environment to said first execution environment.

15. (Cancelled)

16. (Cancelled)

17. (Cancelled)

18. (Previously Presented) A computer program product comprising computer program code for a method for using functionality in a second execution environment in a first execution environment, said method comprising:

calling a method in a proxy interface in said first execution environment; and

converting said method call by said proxy interface to a corresponding method call for execution in said second execution environment wherein said converting said method call further comprises:

using a type description to convert parameters from said first execution environment to said second execution environment.

19. (Original) The computer program product of Claim 18 wherein said method further comprises:

## AFTER FINAL EXPEDITED PROCEDURE

dispatching said corresponding method call for execution in said second execution environment to said second execution environment by said proxy interface.

20. (Cancelled)

21. (Original) The computer program product of Claim 19 wherein said method further comprises:

executing said corresponding method call in said second execution environment, and returning results of said execution to said proxy interface.

22. (Original) The computer program product of Claim 21 wherein said method further comprises:

using a type description to convert said returned results from said second execution environment to said first execution environment.
